Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because corrected drawing submitted on January 07, 2005 have been approved by the examiner. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: Applicant needs to amend the specification to reflect the changes made to the drawings regarding Figs 5 and 12.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-7, 12-13, 15-17 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hecht et al. (6,176,131) (hereinafter Hecht).

Hecht teaches a flow sensing device for installing in an intake air passage of an engine comprising a sensing element, an electronics circuitry (11), a case (51) for protecting the circuitry and trapping means (42) for trapping corrosive compositions. It is known that any type of an adhesive has corrosiveness by the entering gas, equal to or larger than that of the conductive material such as the wires. It is also inherent that the gas in an intake would comprise of sulfur or other compounds.

Allowable Subject Matter

5. Claims 10 and 11 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter:
Prior arts made available do not teach or fairly suggest, alone or in combination, a flow sensing device including a corrosive composition trapping means including a silver alloy or copper alloy containing at least 83% of silver or copper.
7. Claims 4, 8, 9, 14, 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments filed 1/7/05 have been fully considered but they are not persuasive. Applicant argues that the reference does not teach the adhesive coating of Hecht trapping the corrosive composition. It is known in the art that such preventive coatings are used in order to prevent any corrosive gases or compositions from affecting the electronics. Furthermore, such inherent features are not needed to be specifically included in the disclosure. Such functions of these features as described inherently include it, thus not requiring individuals to specify the details. As to arguments to claim 3, the arguments are not persuasive since based on the requirements for protection, an individual may come up with any protective element that would prevent such corrosive effects from entering a protected area.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2855

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
